The Total THC and CBD results are calculated using the USDA accepted and prescribed formula . The formula takes into account the decarboxylation of the acid (A) as is after applying heat. The accepted molecular weight after decarboxylation is 87.7% of the acidic (A) state . SD ± 0.09% (Measure of Uncertainty) ND - None Detected above L.O.D (Limit of Detection). Flower and Biomass results are reported on a DWB (Dry Weight Basis) . Live Plant Results are sampled and reported in realtime with no moisture removed. The entire Live Plant is homogenized.
